**NOTIFICATION OF RELEASE AND INITIAL ABATEMENT ACTIVITIES, U. S.  
DEPARTMENT OF ENERGY ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE  
(RFETS), GOLDEN, COLORADO - TGH-394-94**

EG&G Rocky Flats, Inc., (EG&G) is providing this notification regarding a petroleum release from an Underground Storage Tank (UST) system at RFETS located in Golden, Colorado. The UST is a 1,000 gallon carbon steel tank that was installed in 1968. The UST was used to store diesel fuel for Building 776 at RFETS. During site assessment activities being conducted in preparation for the closure of the UST, one soil sample from beneath the UST indicated elevated total petroleum hydrocarbon concentrations of approximately 100 parts per million, which is well below the remedial action criteria (RAC) level of 500 ppm total petroleum hydrocarbons for RAC Category III. The cause and volume of the release is unknown. Initial abatement activities have already been taken in preparation for closure including the removal of product from the UST system. The UST closure is scheduled for Friday, September 30, 1994. This letter serves as the Initial Abatement Measure and Site Check Report pursuant to the Colorado Department of Public Health and the Environment (CDPH&E) UST Rules and Regulations (6CCR), Subpart F., Section 280.62.

Upon completion of the site assessment and closure activities, EG&G will prepare a report detailing the findings and documenting the closure in accordance with 6CCR 280.72 and 280.63. Copies of the reports will be forwarded to CDPH&E and the Department of Labor, Oil Inspection Section, upon completion.

If you have any questions or require additional information, please call Mike Ferrari at 966-5831.
